Another above par HOG from Artifex Mundi. Personally I like Artifex's games but this one should be a little bit better. The plot is simple. You are a detective who need to solve a series of mysterious murders. The voice and the graphics are quite good but below the average Artifex quality. The hidden object scenes are good but the minigames are simple. If you are not a fan of the genre don't buy it. Otherwise, don't hesitate to spend some coins.. I liked the winter setting and the overall presentation. The story I liked because it was somewhat realistic, not involving fantasy creatures or magic.

Gameplay wise it was not bad, but the game is short and mostly too easy. It lacks complexity on everything that makes a good game in this genre, except the story, which I found somewhat difficult to follow.. I like the plot and it was a simple puzzle to solve. <https://youtu.be/PdJ8q0rSws0>

The addition of 'crime scene' reconstruction and selectable difficulty modes are welcome additions the basic 'hidden object' foundation. The story and puzzles are as convoluted as ever.. Game Mechanics:

The game has hidden-object-scenes and logic puzzles as its core game mechanic.

Plot:

It's a murder mystery, but with a sort of 50s contemporary sci-fi-twist. The characters aren't all that engrossing, but the perpetrator and the use of the freezing liquid makes it slightly more compelling.

Presentation:

The graphics are pretty decent, though some of the animations are a bit on the long side, and the hidden-object-scenes are detailed and full of atmosphere. The surroundings, however, though diverse, are a bit bland and could do with a bit more atmosphere, even though the music is pretty decent. The voice acting also isn't half bad.

Completion:

If you have a spare couple of hours, I suggest you just complete this game, it's pretty doable and shouldn't frustrate you too much.. A mediocre casual point-and-click adventure that won't wow you, but is still quite playable.

There's a story in it, but it's poorly told, with characters that don't make much sense and that are hard to relate to each other. It doesn't help when it seems that the voice actors are more bored than you are.

There are the usual hidden-object scenes and puzzles, all easy and unoriginal.

Still, the game's graphics are polished and fit well with the atmosphere. It's not a bad way to spend a couple of hours.

Finally, thank you so much, devs, for supporting Linux!. I got this game as part of a bundle - I personally would not pay the full price for it.

Overall I enjoyed this game and think it is worth a play if you enjoy hidden object games. The artwork and music were both well-done and the hidden object scenes were not too difficult - though I wish there had been more. Achievements are relatively easy to complete and I was able to get 100% completion. I finished the game in 3 hours.

The game felt very short to me. This is a personal preference, but I like hidden object games that require some "exploring" and backtracking to previously visited rooms. This game did not really require that except in a couple of cases, so it made the game feel very short because you complete all tasks in one room and then just move onto the next and do the same. Again, I recognize this is a personal preference but I thought I would mention it.

There is also some awkward English and typos throughout which I do feel detracts from these types of games.. Good hog game, what stand out most is story that is present all the time not like in many other there is some story bit at the beginning and then random puzzles and ho scenes and little bit of story at the end. Other than that it's pretty much like every other HOG game out there but it feels more polished and more enjoyable to play.. <https://youtu.be/PdJ8q0rSws0>

The addition of 'crime scene' reconstruction and selectable difficulty modes are welcome additions the basic 'hidden object' foundation. The story and puzzles are as convoluted as ever.. Most of the objects that you pick up need to be used right away and "adventure tasks" and usually contained to 1-2 areas, so there isn't much to explore. Story related tasks ("find the clues at crime

scenes") seem artificial and tedious, I found myself mostly skipping them or got past them by clicking randomly while the Skip button was charging (those tasks require no skill whatsoever and are simply frustrating). Apart from that the game is rather, you can easily finish it in under 2h. There are a lot of much better games from the same developer, I would not bother unless you've picked it up in a bundle.

I know that Artifex Mundi games are light on science, but they don't get police work right at all. They do collect clues, but attempting to determine the order of things without any tools? Incredibly difficult. UV lamps don't work that way, either - hand prints aren't discovered by UV lighting, which is used to find blood and other fluids that may have been cleaned up.. Great HOG with a good engine, hilariously awful plot and writing, and relatively simple puzzles. Took me about two hours to play through this game and you can actually enjoy the story without being bogged down by unnecessary things.

. For the price, this game is definitely not worthwhile. The animations are...not good. The English translations are, at times, way off. There were a couple of hidden object scenes I had to complete by random clicking because the clues were not correctly translated. Other than that, the puzzles were pretty simple, which is nice if you're tired and headachy but probably wouldn't be so nice if you're alert. And it was quite a short game, even for a HOG (my actual play time is much less than what Steam shows, as I got called away from my computer and left the game up for several hours). If this is part of a bundle, I'd say go for it, but otherwise, try a different game.. It's not bad, but I wouldn't say it's entirely good. I liked the story and it had some interesting elements different from other HOG's.

Playing on easiest is too easy. I finished game perfectly (with all achievements) in just 3 hours. I'm not really going for a challenge in these games - I mostly like to enjoy the story, but even like that I finish HOG's avaregely in 4 - 5 hours.

Visually it's good, not really much to say about it. But it's very straight forward. You never have something in your inventory that you don't need at the moment, but if you missed it you can't get further. Everything revolves around 2-3 scenes at a moment. This makes the game kind of boring at times.

There's not much to say actually. It's OK game.. This is an Ok HOG. You end up at a hotel to solve a murder. If we had a ranking system I'd say it gets a 3/5. Buy if it's on sale.

. **Easter Eggs in Irony Curtain:**

Comrades!

Before we announce some more details about the Irony Curtain: From Matryoshka with Love ([which you can still add to wishlist by the way](#)), we have something very special for classic adventure games fans!

Although Matryoshkans love potatoes the most, there's also one more thing close to our hearts. It's eggs. Easter eggs to be exact.

Irony Curtain is set in the 50s, but we did our best to spice it up a little with pop culture references from modern movies, comics, games and classic point & clicks. It's kind of mandatory thing when creating the classic adventure game.

Overall, we keep the balance between the story and the references, and there are places you will have a hard time finding them, but sometimes we literally go crazy with Easter eggs in some locations.

Just look at the screenshot below and try to find all the references we've hidden there. There's also a hint under spoiler below:

ANSWERS:

1. key in the shape of Sauron's Eye
2. shape of the island from Monkey Island
3. sketch of a key game from Machinarium
4. crow from Enigmatis 2
5. Pirates of the Carribean key
6. Konami Code

The medals are more monothematic because they are all inspired by the works of one studio. Can you guess what every one of them refers to?

Don't forget to add Irony Curtain to wishlist!
